CARBON REDUCTION PLAN

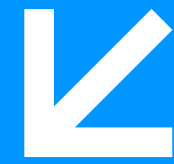

REVIVAL HEALTH UK LIMITED
Publication date: 19th September 2025

**REVIVAL HEALTH UK LIMITED IS COMMITTED
TO ACHIEVING NET ZERO EMISSIONS BY 2040**

BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: to 1st May 2023 30th April 2024

Additional Details relating to the Baseline Emissions calculations.

This represents the initial report on emissions from supplier. Distributed and virtual working structure for the supplier confirms a low carbon footprint. Supplier benefits from establishing low carbon operating environment and intends to maintain such measures for any future expansion.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1.2
Scope 2	0.3
Scope 3	1.0
Total Emissions	2.5

Current Emissions Reporting

Reporting Year: 1st May 2024 to 30th April 2025

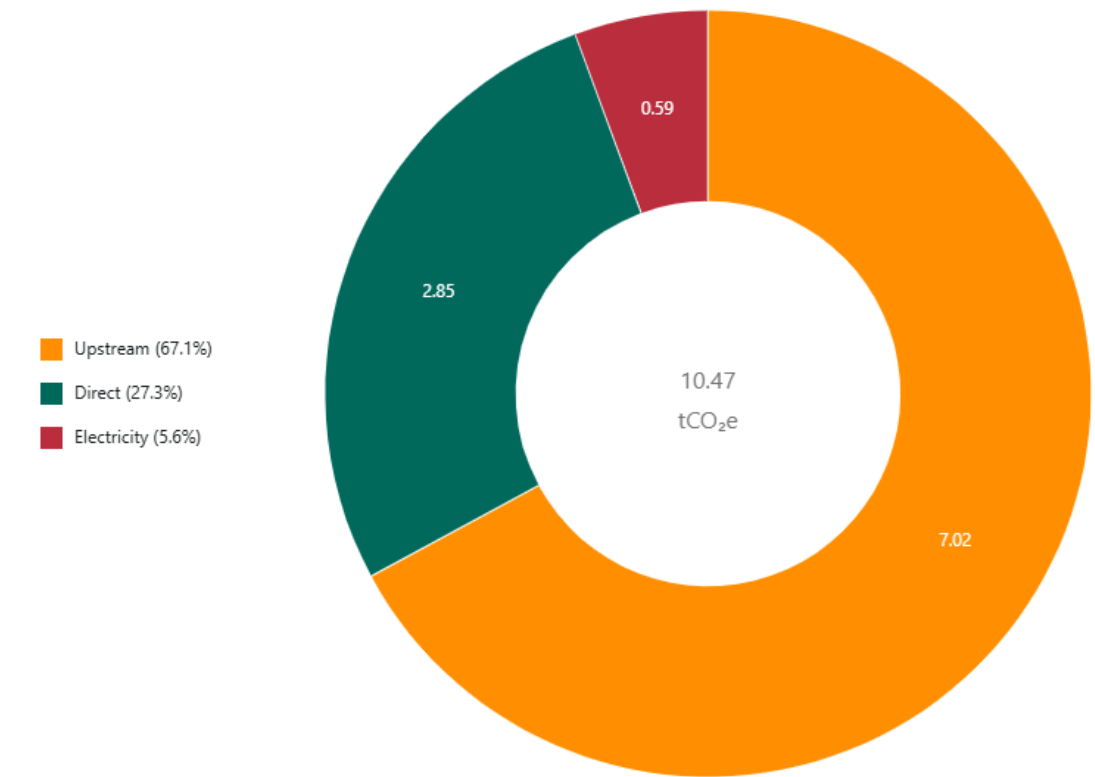

During this second year of operation, the company maintained core business operations. Full operations, including the trading of goods, are planned for the coming years. The emissions shown below reflect the company's basic level of activity during this period.

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	2.85
Scope 2	0.59
Scope 3 (Included Sources)	7.02
Total Emissions	10.47

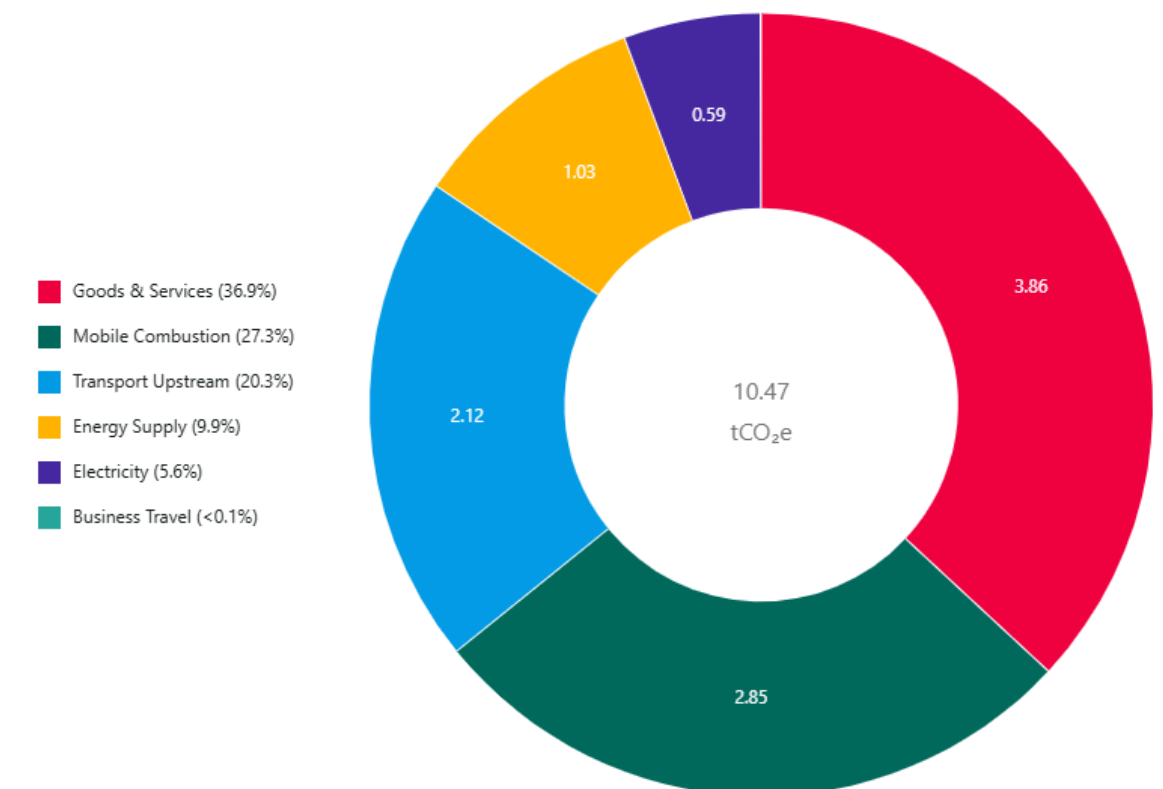

Scope	Description	Metric tCO ₂ e
1	Mobile Combustion	2.85
2	Home worker electricity emissions (home office)	0.59
3	Goods & Services	3.86
3	Energy Supply	1.03
3	Upstream transportation and distribution	2.12
3	Downstream transportation and distribution	0.0
3	Employee commuting	0.0
3	Business travel	<1
3	Waste generated in operations	0.0

Fossil emissions by activity (tCO₂e)

Fossil emissions by activity (tCO₂e)

EMISSIONS REDUCTION TARGETS

We expect our emissions to increase as the business expands its operations as a supplier of medical products. In particular, our Scope 3 emissions from upstream and downstream distribution are likely to rise.

Whilst we anticipate an increase in emissions over the next two years, we aim to reduce them in the years that follow.

To progress toward achieving Net Zero, Revival Health UK Limited has adopted the following carbon reduction targets based on the company's assessment:

- Office electrical supply will be on a Green tariff by 2026.
- Working with our main supplier to increase the percentage of recycled materials and to develop new, low-emission materials that help reduce carbon emissions by 5% year on year.
- As the business grows and our international travel increases, we aim to reduce emissions from flights by 10% annually per £M turnover. This will be achieved through reduced number of flights (utilising remote conferencing as much as possible), as well as the progression of sustainable aviation fuels and aircraft efficiency.
- Working with logistics providers who demonstrate their transition to lower carbon emitting transportation and who share the ambition of achieving net zero emissions for deliveries to the NHS by 2040. Outsourced logistics to start the transition to non-fossil fuel powered vehicles from 2026 onwards.
- Encourage/ incentivise employees to choose lower carbon/ EV car travel both within the car fleet and employee-owned vehicles for domestic travel and commuting.
- Electricity grid emissions to reduce linearly to zero by 2035 (aligned with the UK's target to achieve zero carbon emissions electricity grid), reducing home-worker emissions.
- Offsetting any carbon emissions whose reduction targets are not met by Revival Health UK Limited as set out in this plan.

CARBON REDUCTION PROJECTS

As a new company incorporated in 2023, our company's baseline year is from 1 May 2023 to 30 April 2024. As the company is just beginning its Carbon Reduction Plan journey, we have not yet been able to quantify the impact of any historical initiatives.

However, the following emission-reduction initiatives are already underway:

- **OFFICE WASTE RECYCLE POINTS**
- **PIR LIGHTING CONTROLS WITHIN OFFICE SPACE.**
- **EV CHARGING POINTS AVAILABLE AT THE OFFICE SITE.**
- **HOME WORKING PROVISIONS TO REDUCE THE NEED TO COMMUTE TO THE OFFICE.**

IN THE FUTURE WE PLAN TO IMPLEMENT FURTHER MEASURES SUCH AS :

- Ensuring that all Scope 3 emissions from our suppliers are included in our future carbon emissions reporting, in line with NHS England's Supplier Roadmap ([Greener NHS - Suppliers](#)).
- Reducing Scope 3 emissions associated with our supply chain, including developing contract clauses that address environmental impact reductions and promoting the use of renewable energy by our suppliers.

Where planned targets cannot be met by the carbon reduction plan outlined in this document, emissions will be appropriately offset through purchasing carbon credits.

We will also consider further environmental measurement measures such as ISO 14001 certification.

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard* and uses the appropriate Government emission conversion factors for greenhouse gas company reporting*.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard*.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Revival Health UK Limited:
